Selección de una fecha específica en un mes diferente al actual

The screenshot shows the jQuery UI Datepicker demo page. At the top, there's a navigation bar with links for Demos, Download, API Documentation, Themes, Development, Support, Blog, and About. To the right of the navigation is a search bar. The main content area has a title "Datepicker" and a subtitle "Select a date from a popup or inline calendar". Below the subtitle is a text input field containing the date "02/15/2026". To the left of the main content, there's a sidebar with two sections: "Interactions" (containing Draggable, Droppable, Resizable, Selectable, and Sortable) and "Widgets" (containing Datepicker). A blue arrow points from the "Date" input field towards the "Interactions" section of the sidebar.

Como cristina usuaria de la aplicación DatePicker
Quiero seleccionar una fecha desde el calendario emergente usando datos desde un archivo excel
Para evitar errores al ingresar fechas manualmente

✓ Seleccion de una fecha especifica en un mes diferente al actual

The screenshot shows the jQuery UI Datepicker demo page. The main content area displays a calendar for February 2026. The current date is highlighted with a red circle around the number 19. A blue arrow points to the left from the 19th, pointing at the dates 17 and 18. Another blue arrow points to the right from the 19th, pointing at the dates 1 through 19 of the next month. The sidebar on the left lists various interactions and widgets, and the right sidebar lists examples of datepicker usage.
